

## Publications involving studies at the William L. Hutcheson Memorial Forest

John A. Small

Rutgers, The State University of New Jersey

Research was an activity of the highest priority when the William L. Hutcheson Memorial Forest was donated to Rutgers, The State University of New Jersey by the United Brotherhood of Carpenters and Joiners of America in October 1955. An endowment fund of over \$50,000.00 contributed by individuals and organizations was dedicated to maintenance of the Forest and the support of research therein. Research had been active in the Forest while owned by Thomas Mettler and some papers had been published. The citations listed here have been arranged by years and alphabetically within the year. Papers presented before societies have been included where an abstract has been published which might be cited. Total number of titles for 22 years, including the current volume, is 85.
